

*July 25, 2007*

*Dear Dean,*

*Thank you for the remarkable training that Belle, our chocolate lab, received while under your supervision. Belle went from an uncontrollable dog to a dog that stays by our side and waits for our next command. Belle no longer takes us for a walk, we take her for a walk. It is amazing that Belle went from pulling us on a leash to heeling by our sides. Even our daughters who are nine and seven are able to take our dog for a walk. Our highly energetic dog no longer bolts out of the yard and is impossible to catch. Belle now sits at the fence gate and comes when she is called. Belle use to be extremely aggressive with food. Before you worked with Belle, she would aggressively take a treat from our hand. We are amazed that Belle is now gentle when food is present. Thank you again for the hard work and dedication with Belle. Best luck to you and your family in the future.*

*Sincerely,*

*Stacey Baker*
